

Your leading Swiss personnel service provider in healthcare

For years we have supplemented the classic interview with scientifically based psychological diagnostics. Additionally, we offer you a further ease and deepening of your candidate selection process through exercises and role plays and an individually designed company-specific assessment center.

Our assessment center can be compiled of the following elements and can also be used as a **development center** and training potential analysis:

Part 1: Suitability diagnostics

- Personality Structure Analysis
- Team profile
- Sales profile
- Profile of working behaviour
- Forms of failure (derailment)
- Development profile
- Measurement of the verbal, numerical and logical thinking

Part 2: Behavioural and work samples

- Interview
- Self-presentation
- Case study
- Intrain exercises
- Strategy presentation
- Role plays (practical case studies)

The composition of the assessment centre, exercises and role play content are adapted to the position to be filled and your specific requirements.

In Part 2, your candidates are additionally monitored and evaluated with regard to company-specific criteria.

The observation can be carried out together with you or exclusively by consultants of Stettler Consulting AG.

Each candidate receives detailed feedback from one of our psychologists.

The results are summarised in a written report.

Your Coach - Certified Psychologist Birgit Troschel

After studying psychology, I worked in Frankfurt as a management consultant at the audit and accounting firm Arthur Andersen LLP for 10 years. Since 2002 I have been working for Stettler Consulting AG and am responsible for the areas of coaching, training and diagnostics. In 2008 I made partner and became a member of the management board.

**For reference information, we are happy to put you in touch with long-standing clients.
We look forward to accompany you and your team on the road to success!**
